Experience

Self Employed

March 2024 - Present

Contract Developer

Remote

- Developed 20+ generative NFT collections for traditional artists, released on Highlight.
- Built large-scale digital art collection for Art Blocks using JavaScript with p5.js and WebGL.
- Built websites for small businesses with Shopify Liquid, React, Tailwind CSS, and Vite.

Generative Artworks

June 2020 - Present

Co-Founder

Remote

- Used JavaScript with p5.js and three.js to create generative code art.
- Released NFT art and smart contracts on Ethereum with \$12M+ in sales across primary and secondary markets.
- Created code art tooling with Node.js that was acquired by Art Blocks and has over 100 stars on GitHub.
- Served as a panelist at NFT NYC and Art Blocks Marfa Weekend to discuss generative art on blockchain.

Marsh McLennan

June 2019 - May 2021

Technical Lead

Hoboken, NJ

- Led distributed agile development teams using MEAN Stack, Java/Spring, and PostgreSQL.
- Reengineered legacy software applications using modern technologies.
- Worked closely with business stakeholders to ensure successful delivery of new tooling.
- Developed CI/CD pipelines with Docker & Jenkins.

Everest RE

June 2018 - May 2019

Software Engineer

Liberty Corner, NJ

- Designed, developed, and deployed full stack .NET applications on Microsoft Azure and on-premise infrastructure in an agile environment.
- Revolutionized the underwriter submission intake process by introducing AI-powered automated forms processing.

Turbo 360

October 2017 - May 2018

Full Stack Developer

New York, NY

- Built reusable serverless functions and MERN stack applications to expand the Turbo360 development platform.
- Created tutorials and workshops for new and experienced developers to improve the onboarding process.

Education

Stevens Institute of Technology

May 2018

Bachelor of Science, Computer Science

Hoboken, NJ

3.64 GPA

Minor: Science, Technology, & Society
